

Topic 12: Experimental techniques and chemical analysis - Answers

IGCSE Chemistry 0620 Paper 4 topical answer booklet.

Subtopic: Separation methods, titration and chemical tests

Questions in this answer PDF: 2

Use this with the matching topical question PDFs. The answer points are organised by the same source labels.

Short explanation notes are added for harder calculation, electrolysis, equilibrium, rate, salts, organic, metals and practical questions.

Periodic table reference pages are not included to save printing paper.

2024 May/June Paper 41 Question 1

Main topic: Topic 12: Experimental techniques and chemical analysis | Marks: 7 | Answer source: 0620_s24_ms_41.pdf

Extra topic(s): Topic 11: Organic chemistry

Answer points

1(a)

- Contact process

1(b)

- distillation

1(c)

- electrolysis

1(d)

- fractional distillation

1(e)

- fermentation

1(f)

- cracking

1(g)

- chromatography

Easy explanation / reminder

- *Electrolysis tip: cations go to the cathode and gain electrons. Anions go to the anode and lose electrons.*

- *Acids/salts tip: for soluble salts use excess insoluble base/carbonate, filter, then crystallise. For insoluble salts use precipitation.*

2024 May/June Paper 43 Question 1

Main topic: Topic 12: Experimental techniques and chemical analysis | Marks: 7 | Answer source: 0620_s24_ms_43.pdf

Extra topic(s): Topic 11: Organic chemistry, Topic 7: Acids, bases and salts, Topic 4: Electrochemistry, Topic 1: States of matter

Answer points

1(a)

- Haber (process)

1(b)

- electrolysis

1(c)

- filtration

1(d)

- catalytic addition

1(e)

- chromatography

1(f)

- fractional distillation

1(g)

- titration

Easy explanation / reminder

- *Electrolysis tip: cations go to the cathode and gain electrons. Anions go to the anode and lose electrons.*

- *Acids/salts tip: for soluble salts use excess insoluble base/carbonate, filter, then crystallise. For insoluble salts use precipitation.*
